

NACHTCREME

Intensive overnight care for your skin

While we sleep, our skin is working overtime, regenerating itself. Cell regeneration occurs more rapidly, damaged cells are repaired and any moisture lost is regained.

The most important aspect of an anti-ageing regimen is sufficient sleep and a night cream to perfectly complement your skin's natural repair processes. RyBeauty Night Cream is a perfectly developed **extremely hypoallergenic natural cosmetic product** with **enriching ingredients**.

From the moment of its application, with its rich texture and focus on maximum potency (a so-called w/o-cream), you will feel how a protective layer forms on your skin, allowing you to enjoy a refreshed glow over the following days.

Active ingredients

Organic olive oil: supports skin regeneration, makes the skin smooth and silky. Supports the formation of the skin's hydrolipid layer.

Organic avocado oil: has a high vitamin content (vitamin A, B, D, E) and is similar to olive oil in its composition. Avocado oil is particularly gentle for sensitive skin and prevents it from drying out.

Organic sea buckthorn pulp oil: The juice of sea buckthorn berries is rich in vitamin C and antioxidants which protect the body from free radicals.

Organic macadamia nut oil: a special ingredient with a high proportion of poly-saturated glyceride fatty acids. It contains palmitic acid, a naturally occurring substance in the skin which decreases with advanced age and which needs to be replaced.

Rice germ oil: Rice is one of the world's oldest crops. Thanks to the oryzanol it contains which has UVA and UVB-absorbing as well as antioxidant properties rice germ oil is perfectly suited for use in skin-care products.

Organic aloe vera: is moisturising and soothes weathered, irritated skin.

Plankton extract

A special feature of the RyBeauty Cosmetics Range is the plankton extract which is taken from **marine plankton**. The following effects have been proven in studies: It improves the skin's physical barrier, its chemical barrier and supports rapid regeneration of the skin's hydrolipid layer.

Ingredients from the sea - for healthy skin!

The **five pillars** of RyBeauty Cosmetics:

1. Care and repair: Organic aloe vera, valuable minerals (zinc) and vitamin E ensure a gentle treatment and provide the body with substances it requires for its own regeneration processes.
2. Protection: With a blend of four oils, a protective layer is formed over your skin, protecting it from irritation, germs and dehydration. This protective

Intensive overnight care for your skin

- layer is also strengthened thanks to the plankton extract in the product.
3. Anti-ageing: The moisturising ingredients (e.g. glycerine, betaine) help to produce smoother skin. Other ingredients included counter-act the ageing appearance of skin (e.g. macadamia nut oil).
 4. Natural cosmetics: With the "Natru" seal, we confirm that our products meet 100 % of the requirements for natural cosmetics.
 5. Hypoallergenic: Only well-tolerated substances are used in the products. The products have been dermatologically tested.

As with **all RyBeauty Products** our Night Cream is

- free from petrochemicals and mineral oils
- free from paraffin and silicon oils
- free from petrochemical substances
- free from synthetic fragrances
- free from sodium-laureth-sulphates and sodium-lauryl-sulphates
- Natural cosmetics given the Natru seal of approval
- Dermatologically tested on skin
- free from allergens and preservatives
- with plankton extract - the power of the sea

Application

Apply to clean skin, covering the skin on the face, neck and neckline.

Skin type

Suitable for all skin types.
